

2026-2027
11th-12th grade Science
Chemistry

Chemistry is the study of the composition, structure, and properties of matter. It is through an understanding of chemistry that the products that have benefited society were discovered, and technologies to sustain the environment were put in place. Knowledge of how matter changes will give us an insight into the origin of life, so we can realize that life could only have been formed by a supernatural act of creation, not by a process of change over time.

- High school science course with lab curriculum
- Lab experiments are included with guidance on where to order the lab equipment and supplies needed for the course
- Based on the principle that those who can understand and apply information do much better than those who simply memorize material

Class size: 8 minimum, 15 maximum

Required Textbooks: Chemistry, Dr Dennis Englin, student and teacher book

School Supply list: coming soon

Instructor: Emily Lowe

Cost: \$380

website: Masterbooks.com

ISBN 13

9781683441342
